

CLEAR SOLE

## Commercial offer

In Kazakhstan, a unique apparatus for drying shoes (soles) was invented, used in rainy and snowy weather in the entrance group of administrative, commercial and residential premises. It should be noted that the device is an innovative environmental solution that improves the aesthetic and sanitary situation of your building and facilities. The device allows you to significantly save water costs, costs for detergents, as well as services of cleaning companies. Moreover, the device reduces the risk of damage due to slipping when walking on a tiled surface (full description and use of the device in the booklet).

We are grateful for the consideration of our commercial proposal for the implementation of the device for drying shoes (soles). We are sure that our offer will be acceptable and optimizing your costs.

The invention is patented in the Republic of Kazakhstan for No. 32493 as well as international applications of the PCT with registered trademark "ZIMA Clear Sole" device for drying shoes. The license agreement with exclusive rights was received by LLC "ZIMA C.S." Kazakhstan from the inventor and proprietor of the patent, Nurlybekov Kairat Nurlybekuly.

Special conditions for installation are not required, installed easily on any free floor surface in the vestibule, entrance group.

The price for 1 unit is 250 000 (two hundred fifty thousand) tenge, without VAT.

Brief description of the device characteristics:

Power supply - 220V

Power consumption of energy - 4 kW (per hour) 19 amperes.

Metal corpus

Width - 35cm, length - 70cm

Weight - 19 kg

Application:

1. A copy of the patent of the Republic of Kazakhstan with an annex on the license agreement;
2. Copy of the certificate of conformity and declaration of conformity of the EAU;
3. The booklet.
