

CLEAR SOLE

Commercial offer

LLC "Zima Klia Sol" presents to you a unique device for drying shoes (soles), used in rainy and snowy weather in the entrance group of administrative, commercial and residential premises. It is worth noting that the device is an innovative environmental solution that improves the aesthetic and sanitary situation of your building, structure, changes the traditional approach to solving this problem (shoe covers are no longer needed). The device allows you to significantly save water costs, costs for detergents, as well as services of cleaning companies. Moreover, the device reduces the risk of damage due to slipping when walking on a tiled surface (full description and use of the device in the booklet).

We are grateful for the consideration of our commercial proposal for the implementation of the apparatus for drying shoes (soles). We are sure that our offer will be acceptable and optimizing your costs.

The invention is certified and protected by patents in the Eurasian Patent Office and also international applications of the PCT with registered trademark "ZIMA Clear Sole" device for drying shoes.

Special conditions for installation are not required, installed easily on any free floor surface in the vestibule, entrance group.

The price for 1 unit is 45 thousand rubles with delivery without VAT.

Brief description of the device characteristics:

Power supply - 220V

Power consumption of energy - 0,4 kW, 19 amperes.

Metal corpus

Width - 35cm, length - 70cm

Weight - 19 kg.

Application:

1. A copy of the certificate of conformity and the declaration of conformity of the EAU;
2. The booklet.
